REMEMBERING BENZIE:

An Oral History Project

April 2021 Update

Our student interns, Leola, Liam, and Olivia have been hard at work! Currently the Remembering Benzie student interns are working on their Legacy Project interviews.

The Legacy Project features interviews with Benzie County residents that have made an impact in our community. Each intern will interview two community members, one interviewee recommended by the Benzie Area Historical Society and one interviewee of their choice. Each session will result in one full, unedited video and one short, edited video focused on a point of interest from within the 1-2 hour unedited interview. The short video will include photos, B roll (secondary footage spliced in), and occasionally, music. Both the unedited, full interview and the edited, short video will be posted to the Remembering Benzie YouTube channel. Legacy Project videos will be released weekly on Tuesdays at 10am beginning April 6th.

Olivia Bailey, Liam Jones, and Leola Richard

We are so proud of the work the interns are doing and the progress they are making! They are putting in a great deal of hard work, thought, creativity, and passion into this project. We have been struck by their desire to really represent their community and touched by how truly excited they have been to make these individual connections. We look forward to sharing their amazing work!

We thank you all for your continued support and excitement for this wonderful program! Please subscribe to our Remembering Benzie YouTube page to watch past interviews recorded by our interns last year and click on notification settings to be notified as new videos are posted.
